Subject: Proposed Update to the Approved Parkway Tree List

I recently asked the Village's tree provider, Doty Nurseries, to review our list of approved parkway trees with the following criteria:

- 1) Include only species that don't "make a mess" (i.e., drop "helicopters," etc.); and
- 2) Include only medium to slow-growing species (we have found that fast-growing trees have a tendency to split and become diseased within a few years of planting)

The proposed updated list is attached with the following explanations:

- Delete **yellow** highlighted items – either because they are old varieties that nurseries no longer carry or they do not meet the two criteria above.
- Wording in **red** shows the current cultivar we want to use vs. the old cultivar
- A couple of additions are included at the bottom of the list.

If approved by the Tree Board, the list will be finalized and presented to the Village Board in ordinance form for final approval.

Approval is requested from the Tree Board of the attached revised list of approved parkway trees.
